Notes:

• New York City wage data sourced from the New York State Department of Labor (DOL) at https://labor.ny.gov/stats/lswage2.asp.

• New York City-Newark-White Plains metropolitan statistical area (MSA) wage data sourced from the Bureau of Labor Statistics (BLS) at https://www.bls.gov/oes/#data.

• Occupational wage data published by BLS and DOL are structured according to the Standard Occupation Classification (SOC) system, a framework used by Federal statistical agencies.

• Wage data is unavailable for some occupational titles. These titles were omitted from the table since there is no basis for comparison.

- Imputed wages are based on a 40-hour work week over 52 weeks per year. Both occupational wage data set published by BLS and DOL are derived from the Occupational Employment Statistics (OES) survey, which asks employers to report wages according to hourly rates for part-time employees. Employers may report by hourly or annual wages for full-time employees.
- Trade descriptions were assigned as closely as possible to SOC occupational titles and job descriptions. These assignments were compared with the results of two other classification methods for agreement. This analysis excluded construction occupations that are primarily involved in infrastructure projects (e.g. tunneling machines) or extraction (e.g. oil derricks). See the methodology statement here for more information.
- Wage is exclusive of fringe benefits, even if those are paid in cash. To view the fringe associated with prevailing wage job titles, view the simplified schedules here.
- The Article 8 §220 New York City Prevailing Wage schedule for construction workers (2017-2018) is available from the Comptroller's office here: https://comptroller.nyc.gov/services/for-the-public/nyc-wage-standards/wage-schedules/prevailing-wage-archived-schedules/.
- The Davis-Bacon Act Prevailing Wage schedule for the New York City region, NY-3, is found here: https://wdol.gov/dba.aspx.

• For more information on the construction of this table, see the <u>Technical Notes.</u>

Notes:

• New York City wage data sourced from the New York State Department of Labor (DOL) at https://labor.ny.gov/stats/lswage2.asp.

• New York City-Newark-White Plains metropolitan statistical area (MSA) wage data sourced from the Bureau of Labor Statistics (BLS) at https://www.bls.gov/oes/#data.

• Occupational wage data published by BLS and DOL are structured according to the Standard Occupation Classification (SOC) system, a framework used by Federal statistical agencies.

• Wage data is unavailable for some occupational titles. These titles were omitted from the table since there is no basis for comparison.

- Imputed wages are based on a 40-hour work week over 52 weeks per year. Both occupational wage data set published by BLS and DOL are derived from the Occupational Employment Statistics (OES) survey, which asks employers to report wages according to hourly rates for part-time employees. Employers may report by hourly or annual wages for full-time employees.
- Trade descriptions were assigned as closely as possible to SOC occupational titles and job descriptions. These assignments were compared with the results of two other classification methods for agreement. This analysis excluded construction occupations that are primarily involved in infrastructure projects (e.g. tunneling machines) or extraction (e.g. oil derricks). See the methodology statement here for more information.
- Wage is exclusive of fringe benefits, even if those are paid in cash. To view the fringe associated with prevailing wage job titles, view the simplified schedules here.
- The Article 8 §220 New York City Prevailing Wage schedule for construction workers (2017-2018) is available from the Comptroller's office here: https://comptroller.nyc.gov/services/for-the-public/nyc-wage-standards/wage-schedules/prevailing-wage-archived-schedules/.
- The Davis-Bacon Act Prevailing Wage schedule for the New York City region, NY-3, is found here: https://wdol.gov/dba.aspx.
- For more information on the construction of this table, see the <u>Technical Note.</u>

#### Notes:

• Wage data for the New York City labor market is sourced from the New York State Department of Labor at https://labor.ny.gov/stats/lswage2.asp

 According to the NYS DOL, "employment and wage data by occupation are based on the Occupational Employment Statistics (OES) survey, which collects information from approximately 51,000 businesses. Estimates are based on responses from six semi-annual panels collected between November 2014 and May 2017. Wages were then updated to the first quarter of 2018 by making cost-of-living adjustments."

• The OES survey from which the wage data is derived, defines "employment" as the number of workers who can be classified as full-time or part-time employees. The survey excludes the self-employed, owners/partners of unincorporated firms, and unpaid family workers.

• The entry wage is an average of the bottom third of wages in an occupation. The experienced wage is the average of the top two-thirds of wages in an occupation.

• AMI is computed for the NYC region based on a family of 3

#### Notes:

• Wage data for the New York State ("statewide") labor market is sourced from the New York State Department of Labor at https://labor.ny.gov/stats/lswage2.asp

- According to the NYS DOL, "employment and wage data by occupation are based on the Occupational Employment Statistics (OES) survey, which collects
  information from approximately 51,000 businesses.
- The OES survey from which the wage data is derived, defines "employment" as the number of workers who can be classified as full-time or part-time employees. The survey excludes the self-employed, owners/partners of unincorporated firms, and unpaid family workers.

• The entry wage is an average of the bottom third of wages in an occupation. The experienced wage is the average of the top two-thirds of wages in an occupation.
